Profile

I am a Software Engineering student, focused on web systems such as websites, landing pages, SaaS, and management systems. I am focused on personal development, especially continuous learning of languages, and I am currently an exchange student in Uppsala, Sweden.

Soft Skills

- Communication
- Teamwork
- Responsibility

Technical Skills

- **Programming Languages:** Java (Spring Boot), JavaScript (React), TypeScript, HTML, CSS, C, Node.js , Next.js

- **Databases:** SQL, Oracle, MongoDB

- **Cloud:** Docker, AWS

- **Tools & Version Control:** Git, GitHub, GitLab, GitHub Actions, GitLab CI/CD

- **Agile methodologies : Scrum**

Languages

- Portuguese : Native
- English : Advanced
- Spanish : Intermediate
- Germany : Basic

Education

UU - Uppsala Universitet
Bachelor's Degree in Computer Science (2026/1 - 2026/2)

PUCRS – Pontifical Catholic University of Rio Grande do Sul
Bachelor's Degree in Software Engineering (2024/1 – 2027/2)

Leonardo da Vinci Alfa School – Porto Alegre, Brazil
(2018 – 2023)

Experiences

Junior Full-Stack Developer
July 17, 2025 – SUPERNOVA DIGITAL – São Paulo, Brazil - Now

It was my first professional opportunity in the technology job market, which has been essential for my growth as a software engineer.

Junior Software Engineer focused on web systems, including management and transaction platforms. I work with React, Node.js, PostgreSQL databases, and AWS for cloud deployment and infrastructure.

I work remotely, and this company gave me my first professional opportunity in the technology job market, which has been essential for my growth as a software engineer.

Projects

Alhopan Project - Freelance (November 2025 - January 2026)

This is my first freelance job. It is a landing page for a garlic bread and pasta company from Brazil, it was made with just one colleague. It was developed in React.js , TailwindCSS and ShadCN.

Programa manejo de Estresse - Academic Project - PUCRS

AGES - Experiment Agency of Software Engineering

Developed during a university course, this project was built for a psychologist with techniques to remain calm. It was created using React, TailwindCSS, Java Spring Boot, and a PostgreSQL database. The project lasted 4 months, following the Scrum methodology, with strong emphasis on idea-sharing, collaboration, and soft skills development.

Se Fosse Doce - Academic Project - PUCRS

AGES - Experiment Agency of Software Engineering

An e-commerce platform developed for the "Se Fosse Doce" store, specialized in selling cookies. The solution was built with React, SCSS, Java Spring Boot, and databases in PostgreSQL and MongoDB. The project spanned 4 months, applying the Scrum methodology and focusing on delivering a scalable and user-friendly digital shopping experience.

Weather Global Controller

Created a weather monitoring platform integrated with a global weather API, providing real-time data visualization of temperature, humidity, and weather. The project emphasized API integration, UI design, and client-side data handling.
